\$489.00 per kit

SAVE \$104.73

6 MONTH STARTER KIT

- INCLUDES:**
- 1 u-test Incubator
 - 10 boxes of 25 BIs
 - 1 u-test log book

\$699.00 per kit

SAVE \$143.48

maxill is pleased to provide you with our In-Office Biological Monitoring kits and products that are 100% compliant with all of Canada's Provincial and Federal Guidelines for the Dental Community. We offer you the best price in the industry for our Starter Kits, Biological Indicators and our Class 5 Steam Integrators as well as three separate PACE Approved in-office Continuing Education programs.

u-test Biological Indicator (BI)

Biological indicators are the most accepted means for monitoring of sterilization because they directly assess the procedure effectiveness in killing the most resistant type of micro-organisms which are bacterial spores. The bacterial spores used (G. stearotherophilus) are more resistant and present in greater numbers than common microbial contaminants found in the dental office. Therefore an inactivated biological indicator signifies other micro-organisms that underwent the same process have actually been destroyed, thus confirming sterilization.

Biological Indicators #81121
(25 indicators per box)

1-3 Boxes
\$69.75 per box

4+ Boxes
\$49.75 per box

BUY 5 BOXES OF BI'S AND GET 1 BAG OF SI'S FREE!

*CANNOT BE COMBINED WITH STARTER KITS

u-test SI Steam Sterilization Integrators

u-test SI steam sterilization integrators are true class 5 chemical indicators in compliance with ANSI/AMMI/ISO 11140-1:2005. u-test SI are migrating sterilization integrators which allow for ease of process monitoring.

Steam Sterilization Integrators#81124

What is maxill Continuing Education?

The maxill continuing education program is an ongoing series of Infection Control courses designed to keep your office up to date on a variety of topics and techniques. maxill CE components are created with our audience in mind and include information from the following credible and industry focused sources:

- Canadian Dental Association (CDA)
- Health Canada (HC)
- World Health Organization (WHO)

The most important part of education is making sure it is credible, correct and applicable to the audience, you.

How do I schedule a presentation?

To book an appointment or to find out more information email us at continuingeducation@maxill.com. You can also call 1-800-268-8633 and let us know what day and time works best for you.

Current Courses

There are currently three courses available to you. Each course is approximately one hour long, in lecture format, and can be scheduled for your convenience at a time and location of your choosing. There will be more courses introduced on a regular basis. Your local maxill representative will contact you about future courses.

COURSE 2: INSTRUMENT REPROCESSING

This maxill Continuing Education component will detail the ideal process and steps involved in reprocessing in accordance with current best practice documents. It is important to remember that not every office or situation is the same, and thus individual processing cycles should be tailored to meet the needs or constraints of your office. This course will provide you with a solid understanding of IR and the tools necessary to develop your own IR protocols.

COURSE 1: SURFACE DECONTAMINATION

Surface Decontamination is the process of removing and destroying organisms from surfaces in medical settings. Although this procedure sounds very straight forward there are multiple aspects of surface decontamination that must be taken into consideration in order to develop a proper SD protocol in your setting. This course will provide you with a solid understanding of SD as well as the tools necessary to develop your own SD protocols.

COURSE 3: STERILIZATION MONITORING

Ensuring sterility is an obligation of the health care provider to protect the health and safety of patients in all medical settings. This maxill Continuing Education component will present the current best practice protocols for Sterilization Monitoring and assurance. There is a large amount of misinformation and confusion that is currently circulating on this topic, however this educational component focuses on cited protocols of respected provincial and national authorities. This course will provide you with a solid understanding of Sterilization Monitoring and the tools necessary to develop your own protocols to meet compliance.
