The Ster-FX BIN is a germicide tray designed for soaking instruments in a variety of solutions including enzymes, detergents, phenolics, glutaraldehydes and other sterilizing, disinfecting and pre-soaking solutions.

Pair up the Ster-FX BIN with Zymax 128 or Zymax LF Enzymatic Cleaning Solutions to soak instruments before cleaning and sterilization. The Ster-FX BIN can also be used with Ster-FX Chemosterilant & Sporicide to sterilize reusable semi-critical and critical medical devices by immersion.

Zymax Enzymatic Cleaning Sprays

Zymax sprays are ideal for saturating instruments when soaking is not an immediate option. Both sprays effectively coat the instrument to help ensure organic matter does not harden and complicate the cleaning/reprocessing process. Zymax Enzymatic Cleaning Sprays are a complementary addition to instrument re-processing as a pre-cleaning step.

Zymax LF Low Foaming Kinetic Enzymatic

Zymax LF is a multipurpose cleaner featuring a blend of enzymes that loosen and remove dried debris, blood, protein and mucin deposits. Use Zymax LF to soak instruments before cleaning and as an ultrasonic cleaning solution. Its low foaming formulation also makes it a great choice for use in evacuation systems.

GET A FREE BOTTLE OF Zymax LF WITH THE PURCHASE OF A Ster-FX Bin
