tb Minuteman NEX GEN Disinfectant is a new addition to maxill’s line-up of hard surface disinfectants. In addition to disinfecting against HIV-1, tb Minuteman NEX GEN has the added benefit of disinfecting against Hepatitis B (DHBV) and Hepatitis C (BVDV) to assure significant reduction of risk of cross-infection from these three commonly feared bloodborne viral pathogens. tb Minuteman NEX GEN may be used on a multitude of non-porous hard surfaces and is also gentle enough to use on dental chairs!*
What makes tb Minuteman NEX GEN a better broad spectrum disinfectant?

All disinfectants inactivate or destroy microorganisms such as bacteria, viruses or fungi using one or multiple modes of antimicrobial action. What differs from product-to-product is largely the method by which this microbial destruction occurs. If a disinfectant contains only one active ingredient that works by only one method of destruction, it may not be as effective on multiple common microorganisms as a product containing multiple active ingredients. tb Minuteman NEX GEN has four active ingredients combined in a balanced concentration to exert optimal antimicrobial activity. This formulation is designed to inactivate a broad spectrum of microorganisms by multiple modes of action, within efficient contact times. This ensures excellent disinfection results and peace of mind.

In addition to standard testing, tb Minuteman NEX GEN efficacy has been proven against the difficult to kill genus of microorganism known as Mycobacterium. This testing gives tb Minuteman NEX GEN its mycobactericidal (or tuberculocidal) claim. A mycobactericidal claim is very important to look for when choosing a broad spectrum disinfectant. Due to their unique cellular structure, Mycobacteria are very resilient. They are among the most difficult types of microorganisms to kill and thus are the benchmark test organisms used by the CDC to meet and exceed the requirements of an intermediate level disinfectant.

### 1-minute contact time
- Human Immunodeficiency virus type 1 (HIV-1)*
- Duck Hepatitis B Virus (Surrogate for Human Hepatitis B Virus)*
- Bovine Viral Diarrhea Virus (Surrogate for Human Hepatitis C Virus)*
- Rotavirus
- Human Coronavirus
- Avian Influenza A (H3N2) Reassortant virus
- Herpes Simplex Virus Type 1
- Herpes Simplex Virus Type 2

### 3-minute contact time
- Mycobacterium bovis BCG
- Pseudomonas aeruginosa
- Staphylococcus aureus
- Salmonella enterica
- Vancomycin Resistant Enterococcus faecalis (VRE)
- Methicillin Resistant Staphylococcus aureus (MRSA)
- Adenovirus type 5 (ATCC VR-5)
- Feline Calicivirus (Surrogate for Human Norovirus)
- Trichophyton mentagrophytes

### Active Ingredients:
- n-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride...........0.34%
- Didecyl dimethyl ammonium chloride.....................0.51%
- Ethanol ......................................................................6.84%
- Isopropanol .............................................................13.68%

### Spray Bottle
- DIN 02488981
- 946 mL spray bottle
- #61155
- $14.50/bottle

### Refill Jug
- DIN 02488981
- 4.73 L jug
- #61150
- $69.29/jug

### Regular Wipes
- DIN 02488973
- 160 wipes tub
- #61160
- $24.55/tub

### Regular Refill
- DIN 02488973
- 160 wipes refill roll
- #61190
- $19.63/refill

### JUMBO Wipes
- DIN 02488973
- 110 jumbo wipes tub
- #61180
- $25.20/tub

### JUMBO Refill
- DIN 02488973
- 110 wipes refill roll
- #61195
- $21.60/refill
