

CHLORHEXIDINE GLUCONATE SOLUTION USP

Preparation of a 0.12% Chlorhexidine Gluconate (CHG) Rinse Using Chlorhexidine Gluconate Concentrate (20%)

To prepare a 0.12% CHG Rinse, use a suitable Base Rinse such as distilled water, nonionic or cationic mouthwash. Cationic mouthwashes contain cetylpyridinium chloride (E.g. PerioX).

Volume of 0.12% CHG Rinse (mL)	Volume of Base Rinse (mL)	+	Volume of CHG Concentrate to Add (mL)
1000 mL	994 mL		6 mL
500 mL	497 mL		3 mL
250 mL	248.5 mL		1.5 mL
125 mL	124.25 mL		0.75 mL
