- ✓ Made in Canada

Product Description

PerioX is formulated to deliver the benefits of Cetylpyridinium Chloride (CPC) and Xylitol, complementing good oral hygiene practices.

CPC is a suitable antiseptic agent for use in oral rinses that kills bacteria and other microorganisms. Oral rinses formulated with 0.025% to 0.100% of CPC have been proven effective in preventing dental plaque and reducing gingivitis. PerioX contains 0.05% CPC.

The added benefit of Xylitol helps give PerioX that exceptionally long lasting clean sensation and freshness. Further benefits of all natural Xylitol include an improved sweet aftertaste and further inhibition of acid producing bacteria, namely *S. mutans*.

In addition to daily good oral hygiene practices, rinse with PerioX twice daily* to reap the benefits of CPC and Xylitol.

**Minimum recommended use of Xylitol enriched oral rinses.*
