ipana®

PRE-OP ORAL RINSE

with 1.5% Hydrogen Peroxide

ipana Pre-Op Oral Rinse with 1.5% Hydrogen Peroxide is a preprocedural oral rinse to be used by patients before examinations and dental procedures.

Developed under recommendations released by the Canadian Dental Hygienists Association and reinforced by other Canadian associations, ipana Pre-Op Oral Rinse is designed to help reduce the number of microorganisms a patient may release through airborne aerosols and splatter.

This preprocedural rinse is critical for compliance and helps minimize contamination of operatory surfaces, the dental health care professional and the patient.

Made in Canada

60 Second Rinse

PRODUCT AVAILABILITY

2 L Icy Mint Flavour ..... #40445

Made in Canada with domestic and imported ingredients
