

## maxill

# 35% Phosphoric Acid Dental Etch Gel

**Rx ONLY** FOR PROFESSIONAL DENTAL USE

**35% Phosphoric Acid Dental Etch Gel** is a surface-conditioning agent for treatment of enamel and/or dentin prior to adhesive restoration placement.

**maxill Dental Etch Gel** includes syringe sleeves for enhanced infection control. Use of the syringe sleeve also eliminates the need to disinfect the syringe which can damage the label.

- High contrast colour enhances visibility
- Easy to rinse with no residue
- Precise application; stays where placed
- 15-20 second etch time
- Includes 4 x 5 mL gel filled syringes
- Includes dispensing tips and poly syringe sleeves  
(Additional 22 gauge dispensing tips and poly sleeves sold separately)

15 - 20 Second Etch Time

Precise Application & High Contrast Colour

Made in Canada with domestic and imported parts

Designed and manufactured by maxill in Canada
