Instrument Catalogue

Why buy from maxill?

- ✓ **Ongoing Savings** that you can lock in for online and repeat ordering with **maxQuote**.
- ✓ **Complete Transparency** in person, and online. Your pricing is your pricing and it does not change unless we consult with you. Others like to switch your pricing and have YOU catch it!
- ✓ **We are not a dealer!** maxill has been manufacturer direct for over 35 years. No one touches maxill in pricing. We manufacture our own infection control products in St. Thomas, ON Canada.
- ✓ **We specialize!** maxill carries many products and innovations that no one else has because they were developed by maxill and only for maxill customers.

Be a Price Reporter & Save Even More!

Someone have a sale?
Someone thinks they can
beat maxill on price?

Talk to your maxill Success Representative or call **1-800-268-8633** and speak with customer service about how we **BEAT any price you bring us by 2%!**

Want to try new products with minimum risk? TRY IT FOR CHEAP!

Hundreds of maxill items are available as a Try Me Cheap item. This means you'll get your first order of an eligible item at an exceptionally low price!

Give us a call at **1-800-268-8633** or visit **www.maxill.com/ca/try-me-cheap** to learn more!

TPM Temporary Price Match

Everyone has sales and maxill beats everyone's sales. Contact maxill for beating sales prices and getting a TPM -2% for the duration of the competitors sale.

If it wasn't for maxill, how much would you really be saving?

BUR CONVERSION GUIDE

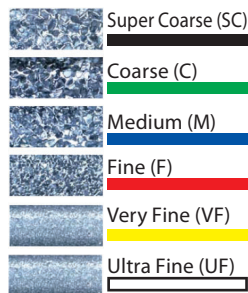

Not sure what bur? Let maxill help!

1. Find out your bur's head diameter by matching it with one of the black dots below.
 2. Measure the bur utilizing the grid to find out the total length and tip length.
 3. Use this catalogue to find the appropriate bur by matching the lengths, head diameter, and type.
- or -**
4. Take a picture, and send the digital image with your clinic name and phone number to info@maxill.com for a maxill specialist to expertly match the instrument and recommend the equivalent Ohio Forge bur. Just lay the bur on the grid with the head pointing towards the black dot that represents the head diameter. Make sure to place the bur parallel to the grid lines, as shown in the example.

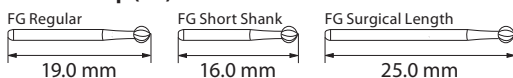

coarseness / grit:

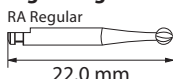

shank types:

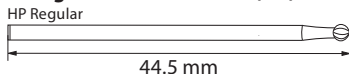

Friction Grip (FG)

Right-Angle Latch (RA)

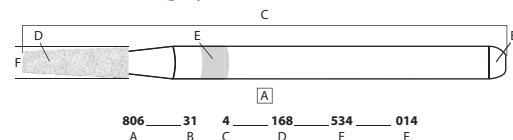

Straight Nose Hand Piece (HP)

*lengths can vary slightly

ISO numbering system:

- A** - diamond instrument
- B** - shank type
- C** - overall length
- D** - form of working part
- E** - size of diamond grain
- F** - maximal diameter of working part

* If printing this page, choose the following settings to keep the measurements accurate: File/Print/Actual Size.

DIAMOND BURS (Single-Patient-Use)

Ohio Forge Single-Use Diamonds offer quality and consistency providing the feel of a new diamond cut with each patient. Significantly increase the preparation quality and eliminate the time consuming expense of sterilization and the worry of cross contamination.

DIAMOND BURS (Multi-Patient-Use)

Ohio Forge Multi-Use Diamonds are designed with a dense 3-layer uniform diamond matrix that enables a greater number of diamond particles to be in direct contact with the tooth surface. This provides a smooth feel, superior cutting efficiency and a long instrument life.

Item #ZRKT0001

CARBIDE BURS - FORCE RESISTANT SOLID (Single-Patient-Use)

Available in:
 10 per Roll
OR
 25 per Roll

STERILE R

Ohio Forge Carbide Burs are manufactured under strict guidelines to ensure consistent, high-quality performance. Only high-grade raw materials are used providing maximum strength and durability. The blade design, angles and concentricity of the bur deliver powerful cutting performance and consistent quality. This results in a well-balanced carbide that delivers minimal vibration and maximizes performance and comfort for you and your patient.

Ohio Forge Endodontic Burs are designed for lateral endodontic access enlargement. The safe-end, non-cutting tip prevents penetration of the pulp chamber floor or the root canal walls and prohibits access from getting deeper while still allowing for lateral expansion.

LABORATORY BURS - COATED LAB CUTTERS (Multi-Use)

Available in:
 1 Single

Ohio Forge Zirconium Nitride Coated Lab Cutters are constructed with tungsten carbide heads and stainless steel shanks. The extremely hard cutting surfaces of 2,800 Vickers provide durability and longevity and the abrasion resistance reduces surface heat for a cooler more consistent surface finish. Ohio Forge laboratory burs are available in a broad selection of shapes, sizes and grits.

LOW-SPEED HANDPIECES

 Low-Speed Handpiece System

The stel Low-Speed Handpiece System brings quality and reliability to a wide range of dental applications. stel handpieces work perfectly with a common handpiece shank, offering convenience, flexibility and affordability for every clinician's needs. Whether it be endodontics, restorative or prophylaxis treatment, stel has you covered.

maxill stel
M4-A20 Air Motor

The stel M4-A20 Air Motor offers efficient, powerful and constant torque with operational speeds up to 20,000 RPM. Its innovative fluid dynamics generate approximately twice the torque of a conventional low speed air motor in the 5,000–10,000 RPM range.

Standard
 These are the basic styles and sizes of curettes. Standard shank and blade.

Small
 These curettes have the longer shanks like the Long configuration, but the blade length has been reduced for pockets that are narrower at the bottom.

Rigid
 These versions feature a heavier shank for a stronger instrument in heavy tartar removal. Also available as a combination Rigid Long configuration.

Long
 The shanks of these curettes are 3 mm longer to reach into deeper pockets. Also available as a combination Rigid Long configuration.

CURING LIGHTS

lumax^{GL}

Broad-Spectrum Guided Light LED Curing Light

The maxill lumax GL is powerful and efficient with a max light intensity of 2,000 mW/cm² at 390-480 nm. With this powerful broad-spectrum light output the lumax GL is capable of curing all common light-cured dental material.

Item #91205

Includes:

- 1 LED Curing Light
- 1 Charging Station
- 1 Light Shield
- 100 Curing Light Sleeves
- 1 Fibre Optic Light Guide

lumax^{DL}

Broad-Spectrum Direct Light LED Curing Light

The maxill lumax DL delivers a powerful, consistent, collimated light beam with a max light intensity of 2,500 mW/cm². The broad-spectrum light output at 390-480 nm is capable of curing all common light-cured dental material.

Item #91200

Includes:

- 1 LED Curing Light
- 1 Charging Station
- 1 Light Shield
- 100 Curing Light Sleeves
- 1 Direct Light Source Head 10 mm

7 CURING LIGHT MODES

TACK

Tack cure, a very short initial curing for temporary processing before final cure. E.g. veneer bonding or temporary cement for in-position and easy removal of excess material.

TURBO

Super fast curing for resin and composite under 2 mm thickness. Also recommended for ceramic brackets, veneers bonding etc.

3' + 3'

3 Seconds Mesial + 3 Seconds Distal for metal brackets resin bonding (with a 1 second blink in between)

6' + 6'

6 Seconds Mesial + 6 Seconds Distal for metal brackets with bonding resin requiring more curing time, and buccal tubes bonding (with a 1 second blink in between)

FULL

For general applications

RAMP

With first 0-5 seconds ramped for general application

SOFT CURE

With first 0-5 seconds ramped for more gentle processing, designed for patients sensitive to heat

CURING LIGHT ACCESSORIES + REPLACEMENT PARTS

lumax Curing Light Meter

- LED & Halogen Curing Light Meter
- Simple, compact design for easy use
- Measures intensity up to 2500 mW/cm²

Light Meter #91210

Acrylic Protective Light Shield

- Hand-held protection for dentists and assistants
- Cold disinfection only

Light Shield #91211

Replacement Eye Shield

- Rotates 360° to accommodate different techniques
- Cold Disinfection only

PENLIGHTS

maxill Oracue LED Examination Penlight

maxill oracue assists operators when excavating caries in already open cavities. Under the violet light exposure and through a filter, dentine carious areas are shown in red fluorescence, while healthy tooth material shows in green fluorescence. Its a quick and simple way to diagnose tooth fractures, detect carious lesions and visualize plaque, and locate hard-to-see root canals.

ULTRASONIC SCALERS + INSERTS

maxi-cav 25K/30K

Dual Frequency Ultrasonic Scaler

The maxill maxi-cav Dual Frequency Ultrasonic Scaler is an extremely versatile, easy-to-use unit that automatically detects whether a 25K or 30K tip is being used and switches the frequency to the appropriate setting. Choose from a range of power settings including low-power debridement for routine scaling and high power for heavy calculus removal. By using the included foot pedal, turbo power can be applied for exceptionally stubborn calculus removal.

Includes:
1 Ultrasonic Scaler Unit,
2 Autoclavable Handpiece Sheaths
1 In-line Water Filter with Spare Disk
1 corded Foot Pedal

INSTRUMENT HOLDERS + ORGANIZATION

Colour Coding is the most effective way to organize. With procedures organized in colour, it creates less confusion for all office staff and generates a more efficient work environment. Colour Coding provides information at a glance without having to read labels or sort through materials.

Zirc Colour Selection: Due to high demand, some colours may take up to 5 days to arrive.
