steri-sox Multi-Channel Sterilization Pouches

Available in 2, 4 and 6 channel pouches, the multi-channel pouches introduce a new alternative to pouching or wrapping cassettes. Unlike a cassette, the plastic window allows you to easily view the contents and reduces labelling requirements. The channels keep instruments separated during sterilization and allow for the full navigation of steam.

If it wasn't for maxill, how much would you really be saving?

maxchek > Backflow Prevention Valves

These unique, one-way autoclavable valves prevent backflow from the saliva ejector into the patient's mouth by closing off airflow when the suction is blocked or restricted. maxchek is inserted into the SE valve and holds the saliva ejector without affecting its performance.
