centrix® Onyx™ 40% Phosphoric Acid Etching Gel

Onyx™ is a viscous 40% phosphoric acid etchant that stays where you place it, does not run and rinses away cleanly and completely. The high-contrast black gel makes it easier to see where you have etched, and where you haven't. Use with any bonding system or technique that requires etching: selective etch or total etch.

- **Highest strength, most effective etchant**
- **Black silicon carbide particles provide the greatest contrast, making it easy to rinse away completely**
- **No dye – no chance of staining porous surfaces**
- **Particles can be agitated on tooth to mechanically scrub and clean the surface**
- **For use on dentin or enamel**

ORDERING INFORMATION

REF 310053	Onyx Etch Kit, 6 x Syringes (1.2 mL), 30 x 22 Gauge Luer Lock Needle Tips
REF 310054	Onyx Etch Kit, 15 x Syringes (1.2 mL), 50 x 22 Gauge Luer Lock Needle Tips
REF 310055	Onyx Etch Kit, 15 x Syringes (1.2 mL), 100 x 22 Gauge Luer Lock Needle Tips
