STEP 4™ oral rinse

- Sweetened with Xylitol
- Alcohol and Sugar Free
- Icy Mint Flavor
- Made in Canada

Product Description

maxill's Step 4 fights bad breath on multiple fronts. Step 4 contains sodium chlorite and zinc which work synergistically to kill bacterial that can cause bad breath. In the mouth, Volatile Sulfur Compounds (VSCs) that cause bad breath are drastically reduced by the action of sodium chlorite with zinc. Step 4 contains 3.1% Xylitol.

When rinsing with pH neutral Step 4, the overall pH of the oral cavity increases helping to reduce acid attack on tooth enamel. The added benefit of Xylitol helps give Step 4 that exceptionally long lasting clean sensation and freshness. Further benefits of all natural Xylitol include an improved sweet aftertaste and the inhibition of acid producing bacteria, namely *S. mutans*.

Twice daily* use of Step 4, together with brushing teeth after meals, nightly flossing and tongue scraping, helps maintain fresh breath and good oral hygiene.

** Minimum recommended use of Xylitol enriched oral rinses.*

Ingredients

purified water, xylitol, polysorbate 20, flavor, sodium citrate, sodium bicarbonate, sodium chlorite, zinc acetate, sodium saccharin, citric acid, FD&C Blue No.1
